

Apache Sqoop

Apache Sqoop moved into the Attic in 2021-06. Apache Sqoop mission was the creation and maintenance of software related to Bulk Data Transfer for Apache Hadoop and Structured Datastores.

The website, downloads and issue tracker all remain open, though the issue tracker is read-only. See the website at <http://sqoop.apache.org> for more information on Sqoop.

Apache Sqoop

Apache Sqoop(TM) is a tool designed for efficiently transferring bulk data between [Apache Hadoop](#) and structured datastores such as relational databases.

Sqoop successfully graduated from the Incubator in March of 2012 and is now a Top-Level Apache project: [More information](#)

Latest stable release is 1.4.7 ([download](#), [documentation](#)). Latest cut of Sqoop2 is 1.99.7 ([download](#), [documentation](#)). Note that 1.99.7 is not compatible with 1.4.7 and not feature complete, it is not intended for production deployment.
